Leaks

Overview

Problem Suspect 1

One instance of "**com.swiftmq.impl.store.standard.cache.StableStore**" loaded by "**com.swiftmq.tools.deploy.ExtendableClassLoader @ 0x2af0b1968ee8**" occupies **869.221.984 (64,53%)** bytes. The memory is accumulated in one instance of "**com.swiftmq.tools.collection.IntRingBuffer[]**" loaded by "**sun.misc.Launcher\$AppClassLoader @ 0x2af0b1920308**".

Keywords

com.swiftmq.tools.deploy.ExtendableClassLoader @ 0x2af0b1968ee8
 com.swiftmq.impl.store.standard.cache.StableStore
 sun.misc.Launcher\$AppClassLoader @ 0x2af0b1920308
 com.swiftmq.tools.collection.IntRingBuffer[]

[Details »](#)

Problem Suspect 2

One instance of "**com.swiftmq.tools.collection.IntRingBuffer**" loaded by "**sun.misc.Launcher\$AppClassLoader @ 0x2af0b1920308**" occupies **467.549.264 (34,71%)** bytes. The memory is accumulated in one instance of "**int[]**" loaded by "<system class loader>".

Keywords

int[]
 sun.misc.Launcher\$AppClassLoader @ 0x2af0b1920308
 com.swiftmq.tools.collection.IntRingBuffer

[Details »](#)

Hint 1

The problem suspects 1 and 2 may be related, because the reference chains to them have a common beginning.
